Attention: Mr. B. Fleeger, President

Gentlemen:

I have your most interesting letter of the 19th instant relative to the strike situation, Senator Moore's speech of November 8, 1945, etc.

I deeply appreciate your comments and observations. I think you know that I see eye to eye with you on this proposition, and you may rest assured that I am not going to wander afield in voting for any of these hairbrained schemes and plans that belong to other types of governments than that which we cherish in this country.

I am certainly glad to have heard from you, and shall always appreciate your giving me your reactions on any vital issue of the day.

Sincerely yours,

George B. Schwabe, M.C.

OKLAHOMA STEEL CASTINGS COMPANY

TULSA, OKLA.

January 19,
1946.

Honorable George Schwabe,
House Office Building,
Washington, D. C.

Dear Mr. Schwabe:

As an operator of a "small business" in your state, I hope you will be interested in my thinking as regards the industrial strife that is now threatening the reconversion program of our country.

The demands made by UAW-CIO on General Motors for excessive wages on the basis of ability to pay are alarming to me, because such a policy would sooner or later result in all wages being set by a political board on the basis of its guess on future operations; and we in "small business" would be regimented to the point where our initiative and our future would be seriously jeopardized.

I hope you will not support legislation that would legalize such demands.

This country's unfortunate situation is most clearly brought out in the speech of Honorable E. H. Moore in the Senate on Thursday, November 8, 1945.

I urge that you support legislation that will give our country a fair and just labor policy. I believe this can be accomplished by the 8-point program proposed by the Senator.

Yours sincerely,

B. Fleeger
President,

OKLAHOMA STEEL CASTINGS COMPANY.
