Hon. Geo. B. Schwabe,
Washington,
D. C.

Dear George:--

I am reading and listening to the radio each day about the strikes being planned against our major industries, and I'm becoming more perturbed each day, wondering just what we are coming to.

I am wondering just how long our government is going to permit this thing to go on. Don't we have any leadership in Washington? You can bet, at a time like this, Old Teddy wouldn't permitted anything like this to happen.

I know just exactly what I would do, if I was a major industry like Ford, Chrysler and General Motors, and I had done the wonderful job these industries have done in our war effort just completed; I'd announce to the government that until the time our government showed some sign of interest in our industries, they would be closed down tighter than a jug, and would remain that way until something was done to give us relief.

George, its a pretty mess, when our government permits a gang of thugs to run this government, and that's just what we are doing when we allow these union leaders to do what is taking place today.

Just how long are you Congressmen, men whom we've sent to Washington to represent us, going to sit idly by and allow this thing to continue? It's time for Congress to come alive and take over the reigns of this government, if we don't have a President with the moral courage to do the thing he knows is right.

Sincerely your friend

Charlie
